Endoscopic Sinus Surgery

Dear Valued Patient,

As a direct result of your visit and clinical evaluation today, you have probably received, or will soon receive, relevant prescriptions.

If you are taking other prescribed medications or have **ANY** serious medical conditions, it is essential that you discuss the possible impacts Dr. Gerbe's prescribed medication may have upon your chronic medical condition(s) or upon your other medications.

It is essential that you discuss this issue with your pharmacist and, in many circumstances, that you actually discuss this issue with your personal care physician. Certainly, it is recommended that you carefully review **ALL** literature accompanying your new prescription(s).

Additionally, if you are taking the **BIRTH CONTROL PILL**, many medications may cause it to be ineffective for an entire cycle! For those patients who are pregnant or are actively trying to become pregnant, all medication **MUST** be approved by your OB-GYN physician!

I \_\_\_\_\_ patient(guardian) have read and understood the above information and that I have also been given a copy.
